Cesar Varela, Full Stack Engineer

Mostly self-thought, I've been a **Full Stack Engineer & Consultant** for 15+ years, always with an eye on both Design and User Experience.

Experience

Frontend Engineer at Cerebral

January 2020 — October 2020

- Developed both D2C and B2C websites, visited by thousands of users daily [Gatsby, Prismic, Cloudfront, React]
- Increased PageSpeed score 4x vs. the previous page
- Improved SEO

Co-Founder, Full Stack Engineer at Botsfactory

October 2016 — December 2019

- Co-Founded Messenger Marketing platform that allowed clients to create their chatbots without having to code
- Co-Designed backend & frontend architecture [ML, Node, GraphQL, React]
- Designed UI/UX [Figma]
- Chatbots created using the platform reached 1M users
- He made business, design, and development decisions
- The company made 200K USD in its first year

Frontend Engineer at VividCortex

December 2013 — April 2016

- Worked on the company's main web app, developing/designing multiple sections/tools [Angular, GO]
- Wrote an integration with Hipchat. that allowed users to interact with the web app, including taking live screenshots of the app [PhantomJS, Node, GO]

Senior UI Developer at Globant

June 2011 — August 2012

- Responsible for the client of an internal app for NYSE [NET, Javascript]
- Developed back-end features of the said app that helped make 40M USD in returns in its first month only [C#, NET]
